Intra-lab reproducibility comparison — pearson
Δ = median(lab_a) − median(lab_b) | CLES > 0.6 = meaningful difference

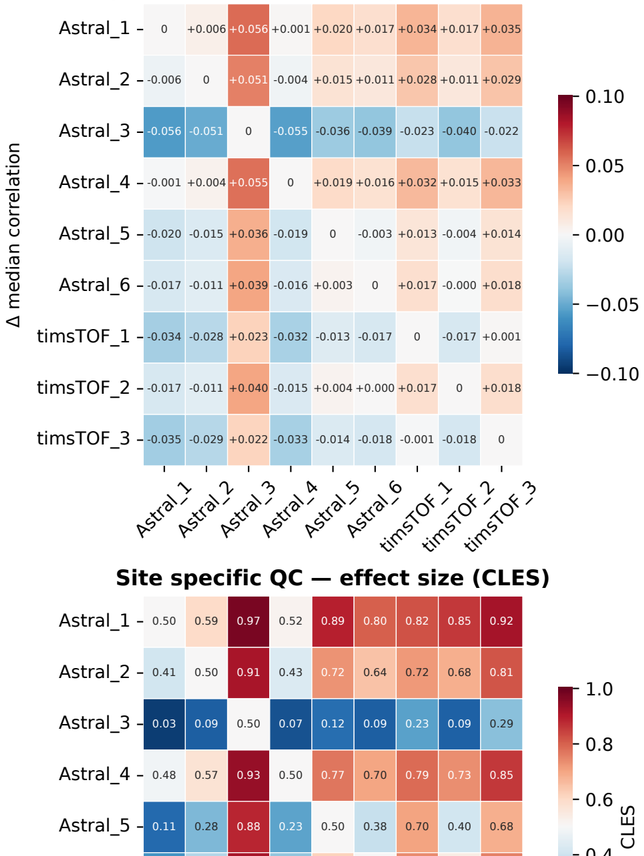

K562 — Δ median pearson correlation

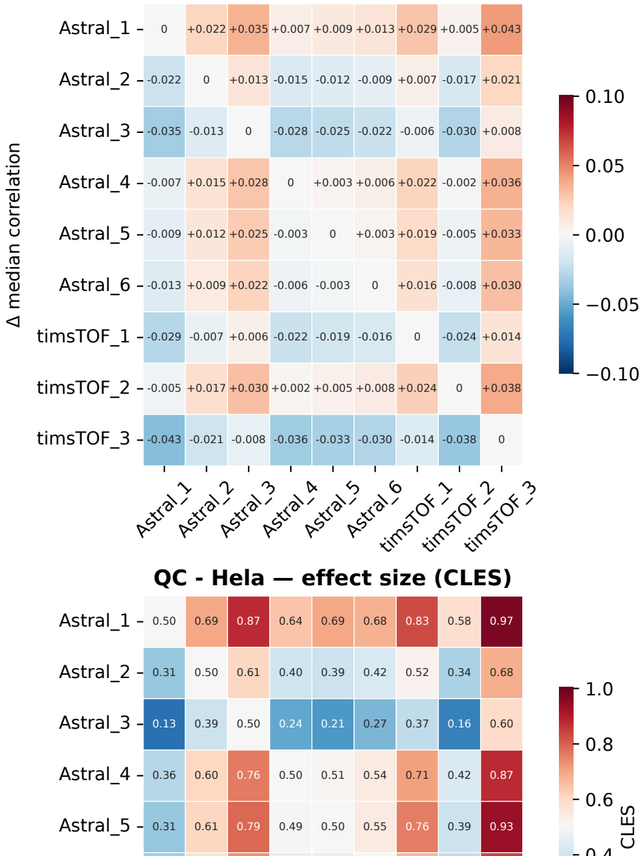

HEK293T — Δ median pearson correlation

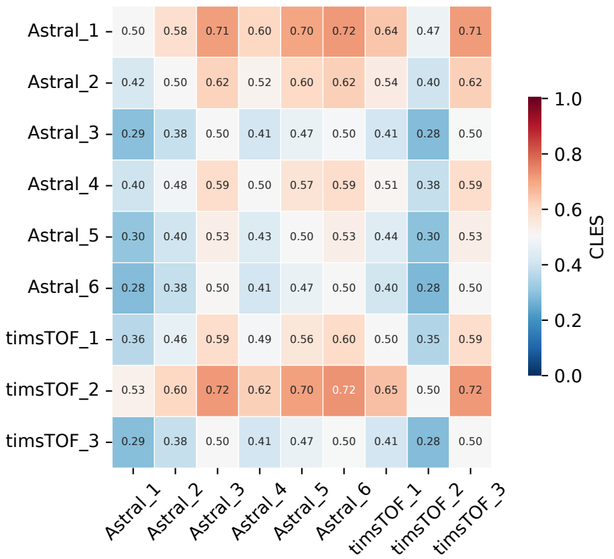

Site specific QC — Δ median pearson correlation

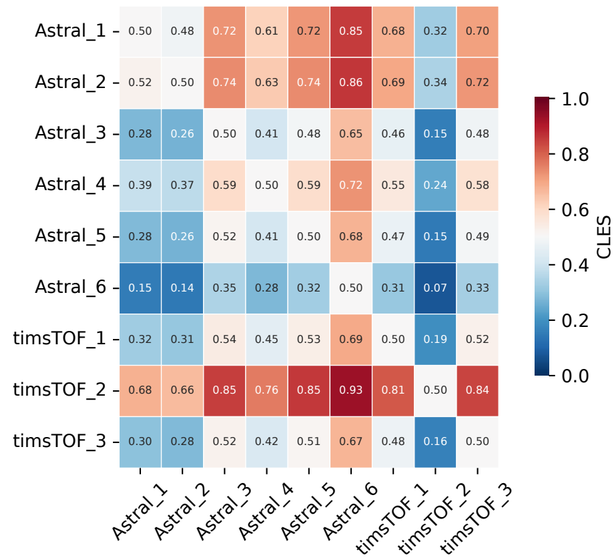

QC - Hela — Δ median pearson correlation

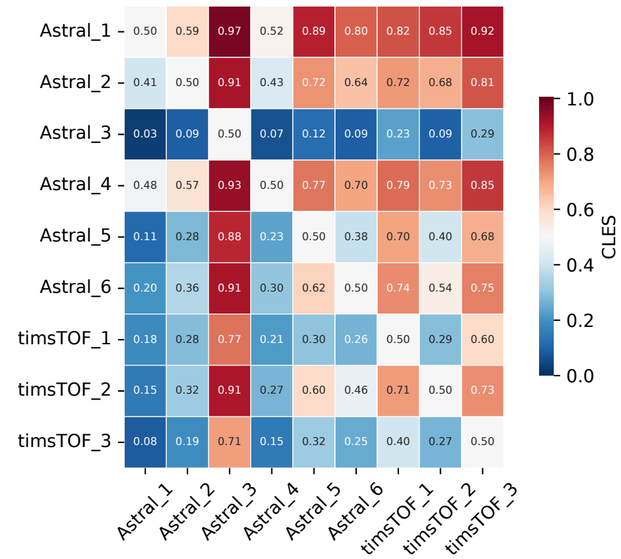

K562 — effect size (CLES)

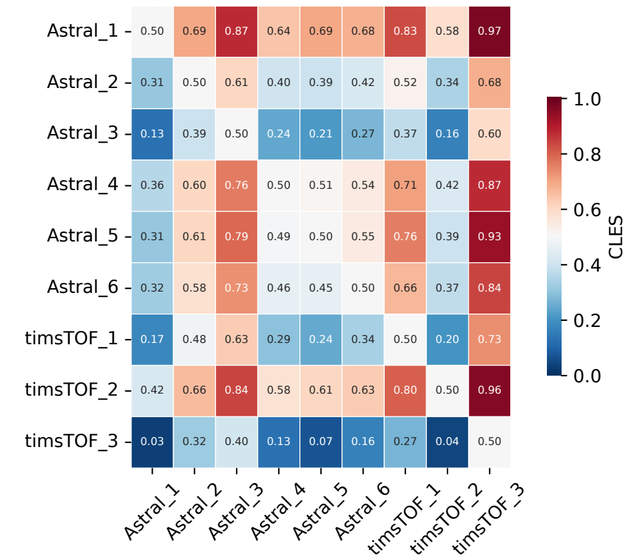

HEK293T — effect size (CLES)

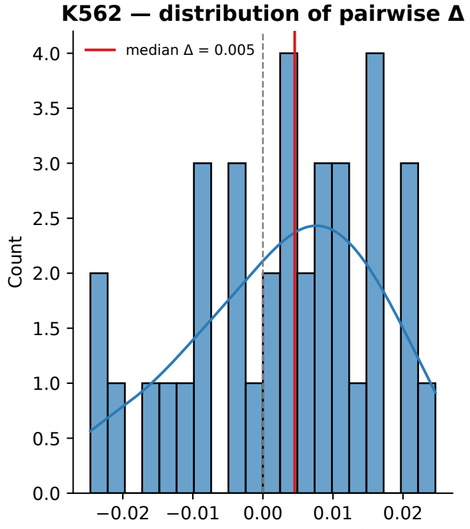

Site specific QC — effect size (CLES)

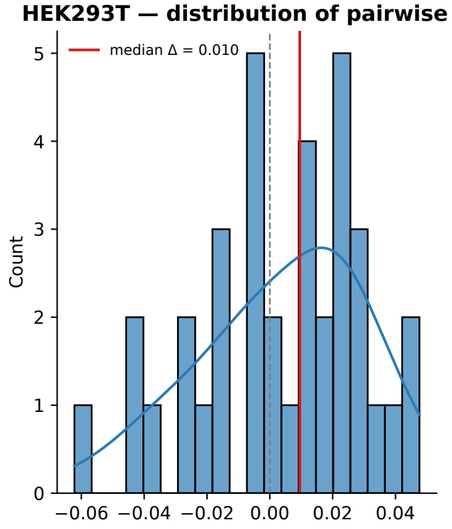

QC - Hela — effect size (CLES)

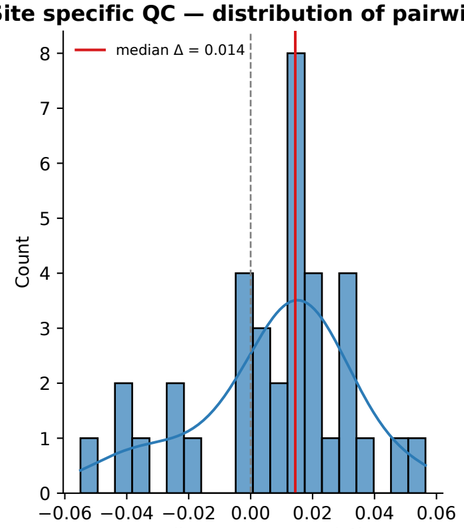

K562 — distribution of pairwise Δ

HEK293T — distribution of pairwise Δ

Site specific QC — distribution of pairwise Δ

QC - Hela — distribution of pairwise Δ
